

### AJAX Assignment:

1) Create an application using HTML and JavaScript to parse XML document.

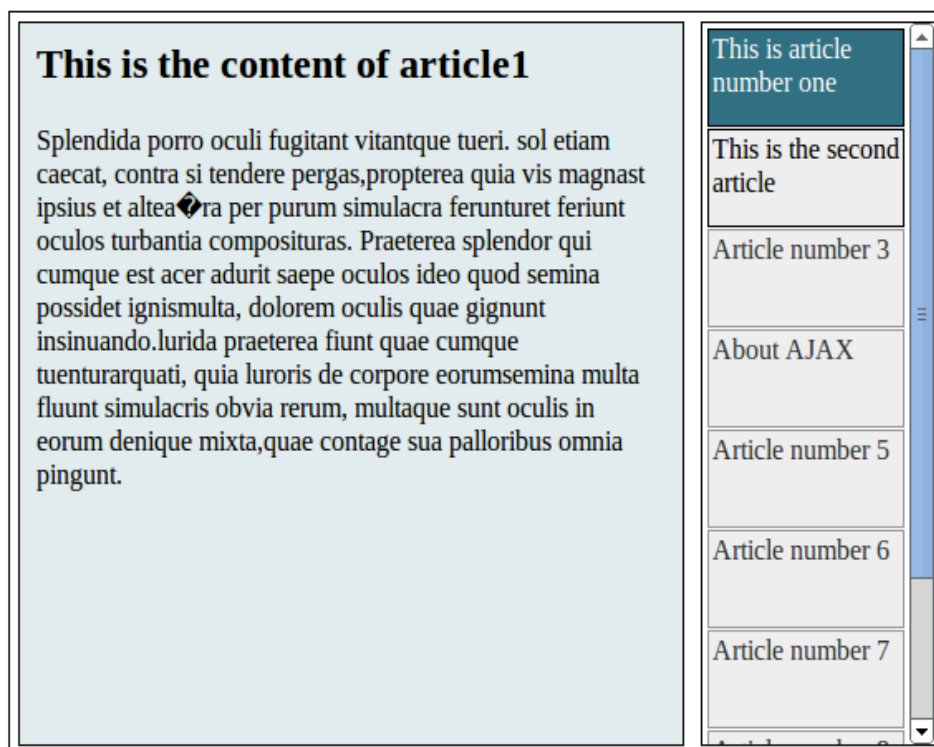

XML Document look like as follows.

```
<Employees>
  <Employee>
    <Name> Rupesh </Name>
    <Address> Hadapsar </Address>
    <Age> 23 </Age>
    <Salary> 7500 </Salary>
  </Employee>
  <Employee>
    <Name> Rohit </Name>
    <Address> Chinchwad </Address>
    <Age> 23 </Age>
    <Salary> 8500 </Salary>
  </Employee>
</Employees>
```

Note:

- Create XML file with five dummy records.
- Display all records on html page using AJAX.

2) Create text file with dummy articles and load with AJAX on click event of buttons. Create minimum 8 articles. See the screen-shot below.

3) Create ticker-tape with AJAX.

Note:

Here move content to upwards.

4) AJAX tool-tip.
